Privacy, regulation and AI safety

Privacy by design

Collect only what is needed

GDPR readiness

Lawful basis, rights, health data

US assessment

HIPAA depends on our role

Wellness, not diagnosis

AI states its limits

Human escalation

Emergencies go to people

Security controls

Encryption, access, monitoring

Device review

Check medical-device rules

Clear policies

Published before launch

A proposed framework, not a claim of certification or full compliance. A technical and legal review will confirm status.
